General Suggestions for your Safety and Security

- For the protection of your family and your personal property, you are asked to use the security system in your home whenever possible, especially when you are leaving home.
- In addition to setting your alarm system, leave a television or radio turned on to deter any would-be intruders. Interior and exterior lights operating on timers are a great deterrent.
- It is important to keep your garage door closed completely to provide you with security and to keep animals out.
- Keep your car doors locked at all times and never leave items of value in sight.

Emergencies

- If you have an emergency, **call 911 first** and then call Security or press the appropriate button on your security panel, usually located in the master bedroom.
- In an emergency, call 911 from any wired or wireless phone.
- **An emergency is any situation that requires immediate assistance** from the police, fire department or ambulance. Examples include:
 - A fire
 - A crime, especially if in progress
 - A car crash, especially if someone is injured
 - A medical emergency, such as someone who is unconscious, gasping for air or not breathing, experiencing an allergic reaction, having chest pain, having uncontrollable bleeding, or any other symptoms that require immediate medical attention.
- If you observe any suspicious activity, immediately call Security – North Gate at 561-747-1141.

FPL Info

- To report a power outage to FPL dial 1-800-468-8243 or remember 1-800-4OUTAGE.
 - Even though you may receive a recording, this is the most efficient number to call to report a loss of power. A work order is created from the information you report and is dispatched to crews in the field.
 - During an outage, your POA and Security Department make numerous phone calls to FPL to expedite the restoration of power. We have learned that all reports left on the recording are received and repairs are scheduled for those locations.
